EDUCATION

California State University, Bakersfield

Bachelor of Science, Computer Science

Anticipated graduation May 2027

Lancaster, CA

August 2025 – present

Antelope Valley College

Associates Liberal Arts Sciences, Math and Science

Lancaster, CA

August 2021- May 2023

SKILLS

Programming Languages: C, SQL, Java, JavaScript, Python, React Native, PHP

Developer Tools: VS Code, Github

Business Software: Microsoft Word, Excel, PowerPoint

Languages: Bilingual in English & Spanish

PROJECTS

Salvage Reseller - *Database Design and Implementation, Group Project*

Languages and Tools used: SQL, PHP, VS Code, Github

- Created an app using PHP allowing for customers to view and purchase products and employees to view analytics and add/delete/update inventory.
- Implemented a database using mock data, displaying products using SQL queries.
- Collaborated with a team using Github for version control.
- Maintained a meeting schedule, assigning tasks to ensure timely project progression and a cohesive design.

Secondary Analysis Research Paper - *Research, Independent Project*

Languages and Tools used: Word, Excel

- Performed exploratory data analysis on 43,000+ vehicles to evaluate relationships.
- Conducted descriptive statistics, correlation analysis, chi-square tests, and linear regression modeling.
- Built histograms and distribution charts in Excel to visualize emission patterns and variability.

Online Shopping Cart Simulator – *Programming, Independent Class Project*

Languages and Tools Used: Java, Javascript, VS Code

- Incorporate user-friendly functionalities such as a price limit, allowing for customers to filter based on a provided budget.
- Presented project orally and through walkthrough presentation to class and professors.
- Achieved a fully functional shopping cart by using Java and Javascript.

EXPERIENCE

Jamba Juice Manager

June 2021- Present

- Offer technical support for troubleshooting offline connections.
- Account for \$5000+ cash deposits, ensuring all transactions were correct and communicated with upper management on the daily/weekly reports.
- Collaborated with team members to ensure daily operations are being completed efficiently and effectively.

"Project Hedgehog"

February 2026 – Present

- Evaluate audio, visuals, and text to help train AI systems to work with formats more accurately.
- Maintain quality scores to ensure effective results.

Robotics Club

August 2025 – Present

- Design add-ons for robot using Tinkercad to 3-D print and update the robot's build.
- Solder hardware, ensuring the robot is within restrictions.
- Test robots build and design abilities before competing.
