EDUCATION

California State University, Bakersfield

Bachelor of Science, Computer Science

Anticipated graduation May 2027

Bakersfield, CA

August 2025 – present

Antelope Valley College

Associates Liberal Arts Sciences, Math and Science

Lancaster, CA

May 2023

Completed Coursework: Programming Languages, Discrete Structures, Computer Architecture I+2: Assembly Language Programming, Software Engineering, Database Systems, Java Programming, C Programming

In Progress: Artificial Intelligence, Internet of Things, Application Development

SKILLS

Programming Languages: C, SQL, Java, JavaScript, React Native

Developer Tools: Github, Visual Studio Code

Business Software: Microsoft Word, Excel, PowerPoint

Languages: Bilingual in English & Spanish

Core Strengths: Communication, following requirements

PROJECTS

Online Shopping Cart Simulator - *Independent Programming Languages Final*

Languages and Tools used: Java, Javascript, GBD Online Debugger

- Designed and implemented object-oriented shopping cart using polymorphism and inheritance.
- Developed dynamic functionality, allowing for customers to filter based on a provided budget.
- Incorporate shipping cost through method calls.
- Presented project orally and through walkthrough presentation to class and professors.

Salvage Reseller – *Database Design and Implementation, Group Project Final*

Languages and Tools Used: SQL, PHP, Visual Studio Code, Github

- Implemented a database using mock data, displaying products using SQL queries called in PHP.
- Utilized PHP to create a website to have a platform for customers to purchase items in the database.
- Created an employee dashboard that displays analytics and add/delete/update inventory.
- Collaborated in a team using Github for version control.

EXPERIENCE

Jamba Juice

Manager

Palmdale, CA
